Cool. Yeah – I think this dude is an SME for sure. Dave (my former colleague) was also working with an R5 RPM on his issues. They have some of the same issues on the military side that we do – action levels, the ubiquitous nature of PFAS, discovery in most water sources, etc.

Cool, I left Kim Harris, seemingly the R5 contact, a message this morning and hooked her up with Scott via e-mail. I asked her to call me back and when she does I will ask her about Dr. Stryner. Thanks

Matt –

I was talking to an old friend who is a consultant to the Air Force. He is working on PFAS issues for them. He told me that the EPA technical expert at RTP is a guy named Dr. Mark Stryner. http://cfint.rtpnc.epa.gov/locator/details.cfm?LAST_NAME=Strynar&FIRST_NAME=Mark&MIDDLE_NAME=J&NICK_NAME=&MAIL_CD=D205-05&SITE_CD=RTP&BUILDING=Bldg%20D&search=1&sort=1&ASSOC_PK=19630&tab=search

You may want to find out if our R5 team is connected with him. He may be a good POC for the State to reach out to....

Have a good weekend man!

Mark

Scott:

We have a couple of contacts in Region 5 who should be able to help with Region 5's approach and possibly hook you up with other contacts nationally including our HQ. They are Joan Tanaka and, I believe, Kim Harris. I will make contact with them here in the Region and ensure that they understand what Michigan is doing and connect with you. I hope this will be helpful and if there is anything else you need please let me know.

Mark – thanks for the introduction to Matt to support the Wolverine sites. I know the DEQ has been engaged in regular discussions with EPA reps in support of Wolverine to date. What I was hoping for was to get into contact with EPA's regional and national SMEs on PFAS. As you are aware, there are multiple sites throughout MI that are impacted by PFAS. We (the State) have brought on Dr. David Stavitz from Brown University to serve as an advisor to both DHHS and DEQ. Here's a link to his bio: <https://vivo.brown.edu/display/dsavitz>

We understand that other states have implemented control measures above the EPA's lifetime health advisory and we are interested in learning more about those. I'm assuming that they did that in concert with the EPA, can you connect us with experts within the EPA on PFAS please?

Thank You,

Scott

Scott,

Sorry for the delay in getting back to you. Matt Mankowski is the point of contact in our program (emergency response) for the Wolverine Sites. I've cc'd him on this message. Our remedial program is EPA's key points of contact on this issue. If you need any support or information from EPA, Matt can connect you to our remedial program coordinators.
